Check Out Sticky Ass Glue and Their Blog

Written by [Zach Peil](#)

Sometimes you just gotta turn two (or more!) things into one thing by sticking them together somehow, whether you're building cabinets or repairing that priceless vase that took an unfortunate trip to the floor. And when a nail, screw or staple is inappropriate, what do you turn to? Glue, of course!

Polyurethane glues are some of the most potent adhesives on the planet, and **Sticky Ass Glue** claims that theirs is the best around. They have a blog, [The Glue Chronicles](#), that's filled with tips and insights, and [their website](#) is pretty clever--definitely worth a visit. You can find some interesting comparisons between their glue and their competitors' glues [right here](#). It looks like their products are available primarily on the west coast for now; here's hoping that they're successful enough to expand nationwide!
